until

```
import java.time.LocalTime;
import java.time.temporal.ChronoUnit;

/**
 *
 * @author bogusz.thierry
 */
public class JavaApplication1 {

    /**
     * @param args the command line arguments
     */
    public static void main(String[] args) {
        // TODO code application logic here
        LocalTime h1 = LocalTime.parse("10:45");
        LocalTime h2 = LocalTime.parse("12:50");

        long m1 = h1.until(h2, ChronoUnit.MINUTES);
        long m2 = ChronoUnit.MINUTES.between(h1, h2);

        System.out.println(m1 + ":" + m2); // même résultat !
    }
}
```
